**Disclaimer:** Most damage entries are related to traffic accidents, but not exclusively. Some entries may end up on the report for different reasons, such as damage assessments, auctions, vehicle inspections, repairs and other similar events, actions or circumstances. Entries like these may indicate, for example, that the vehicle was inspected and assessed at an authorised service centre, or that repairs, warranty service, diagnostics, vehicle inspection or other similar services were performed. These vehicle inspections or assessments may be done due to damage caused during a traffic accident, but also for other reasons, such as legal requirements and/or processes, information published by the manufacturer, warranty or non-warranty repairs, correction of poorly performed repairs, or damage not related to traffic accidents (e.g. theft, mechanical damage, etc.). It is important to note that such entries do not necessarily indicate the consequences of a traffic accident – they may also be related to the use, maintenance or operation of the vehicle in accordance with the requirements and circumstances set by the manufacturer or third parties.

**Damage Glossary****Assessment**

Assessment is the process of evaluating the extent of damage to a vehicle. It involves inspecting the vehicle to determine what repairs are needed, estimating the costs, and deciding whether the vehicle is repairable or considered a total loss.

**Damage**

Damage refers to any physical harm or loss sustained by a vehicle, such as scratches, dents, or broken parts. It can result from accidents, weather, theft, or other incidents and may affect the vehicle's appearance or performance.

**Past repair cost estimate**

If the vehicle has reported damage, the past repair cost is estimated based on where the damage was assessed and is shown in that country's currency. This amount may differ from what you'd expect locally. Here's why: Repair prices vary between countries due to differences in labor rates and parts costs.

The estimate is based on work that is done at official service centers, which are typically more expensive than independent garages.

# Natural disaster exposure

We checked if the vehicle was located in an area hit by a natural disaster at the time it happened.

## No issues found

This vehicle's location was not recorded in the area of a natural disaster.

# Market price

## Market price insights

### Price trend forecast

This vehicle is expected to lose -56% of its market price over the next 7 years.

### Price drop & buying window

The largest drop in market price is expected around 2029, when the vehicle reaches 8 years of age. Buying around this time may offer better value.

### Optimal selling timing

Selling before the largest price drop – expected around 2028 or 7 years of age – may help retain more value.

**Note:** Forecasts are based on current market trends and historical data. Actual resale value may change due to market shifts, condition, location, or other factors.

## Emissions

We analysed how much CO<sub>2</sub> this car model typically produces and what taxes or fees may apply.

### carVertical Insight

This vehicle has high emissions. That could mean higher emission taxes. Check local regulations to avoid surprises.

## Helpful tips after reading the report

Every tip you check off helps you avoid unwelcome surprises later. The more you check, the safer your car deal.

### Based on this report:

- Verify maintenance history**  
The mileage looks accurate, which is good news. Now check if the car was properly maintained throughout its life.
  - Cross-reference the mileage with service book stamps or digital invoices.
  - Inspect wear on key parts to make sure it matches the mileage shown.
- Check for high-mileage wear**  
Higher-than-average mileage means more wear on critical parts. Make sure the car has been maintained accordingly.
  - Inspect suspension bushings and shock absorbers for fatigue or leaks.
  - Verify that major services like timing belts and fluid changes were done on schedule.

### Do these checks before buying a car:

- Get a professional inspection**  
An expert mechanic can spot hidden issues you might miss. Here's what to do next:
  - Book a pre-purchase inspection at an independent or authorised service
  - Ask the mechanic to check key systems: engine, brakes, suspension, electronics
  - Request written notes or a report of any issues found
- Ask for service records**  
Service records show how well the car has been looked after. Here's what to do next:
  - Ask the seller for the car's service book or maintenance records
  - Check for regular oil changes, filter replacements, and timing belt work
  - Note any missing or overdue services
- Check if the mileage matches**  
Make sure the mileage in this report matches the car's odometer readings. Here's what to do next:
  - Check the odometer reading against the mileage in the report
  - Watch for signs of tampering (worn pedals, suspicious dashboard fixes)
  - Ask the seller about any differences
- Take a real test drive**  
A proper test drive helps you spot problems with performance, handling, or comfort – you'll notice much more on the road than you will in the parking lot. Here's what to do next:
  - Drive on different road types: highway, city traffic, and bumpy or uneven surfaces
  - Listen for strange noises or vibrations
  - Pay attention to handling and comfort
- Compare with similar cars**  
Checking other listings helps you know if the asking price is fair – or worth negotiating. Here's what to do next:
  - Search for similar cars online (same make, model, year, mileage)
  - Compare asking prices
  - Look at car condition and equipment
  - Use this info to negotiate with the seller
